

## Opening example databases in Komet Database Viewer

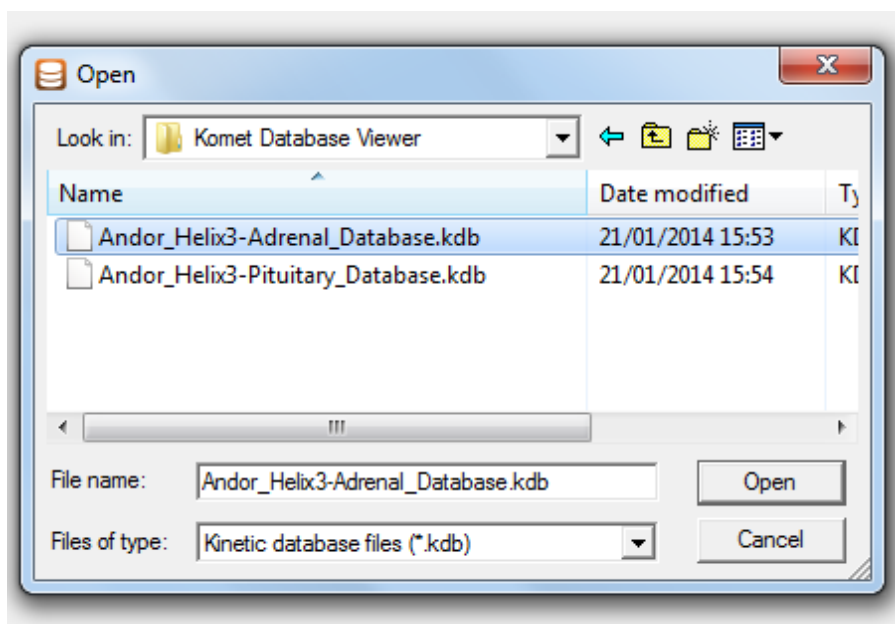

1. Open Komet Database Viewer (DBV)

2. Click on the 'open file' icon shown below.

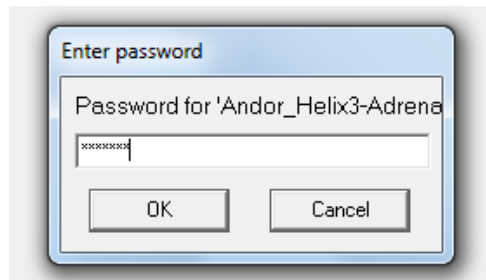

3. Find the location of the example databases on your PC and Open

- You will be asked for a password in order to open each .kdb file.  
Enter the following password for each database:

Andor\_Helix3-Adrenal\_Database.kdb – Password is adrenal

Andor\_Helix3-Pituitary\_Database.kdb – Password is pituitary

- Once the database is open you can perform various types of statistical analysis on the data
