001	YWA	20/03/2025		Initial release (3.1.0)
002	YWA	07/05/2025		Release 3.2.0

Table

1.	Introduction	4
1.	Firmware version 3.2.0	4
1.1.	Bug fixes.....	4
1.2.	Changes	4
1.3.	Miscellaneous	4
2.	Firmware version 3.1.0.....	4

1. Introduction

This document provides a description of the evolutions introduced in the different versions of the Andor CB2 platform firmware.

This document intends to be as complete as possible. However, we advise you to always refer to the Andor CB2 platform User Manual for a complete description of the behavior of the camera.

For each firmware release, this document will present the main evolutions introduced in the release (prominent features), performance improvement of the camera, minor changes and bugfixes.

Finally, changes impacting the default configuration of the camera are provided.

1. Firmware version 3.2.0

1.1. Bug fixes

- Fixed Mono10 issue for IMX487
- Fixed compatibility issues with Euresys GigE Vision stack.

1.2. Changes

- Camera names have been changed
